Contents

The course covers research ethical problems and concepts, such as autonomy and informed consent, scientific fraud and misconduct and the researcher's responsibility for the consequences of his/her research. Research ethical declarations and Swedish legislation on research ethics are introduced. Field-specific research problems are discussed as well as research ethical problems experienced by the course participants. After completing the course, the student should be able to identify and describe common research ethical problems, suggest solutions to the problems and justify the solutions by means of basic ethical principles. The student should also have proficiency in filling in an application for ethical trial of research.

Educational methods

The course consists of lectures and seminars.

Grading

Two-grade scale

General information

The course will be offered during the spring term 2025 (prel. March-April)
